SUMMARY

Product Designer with experience designing research-driven digital products across healthcare and consumer domains. Skilled in product discovery, UX research, interaction design, information architecture, prototyping, usability testing, and accessibility. Passionate about transforming complex user needs into intuitive, evidence-based digital experiences through collaboration, research, and iterative design.

WORK EXPERIENCE

Ajanlens **Thane, Maharashtra , India**

Product Designer *Dec 2025 - Present*

- Leading end-to-end product design across healthcare products, translating user needs and business goals into intuitive mobile and web experiences.
- Conduct user research, usability testing, and design validation while creating user flows, wireframes, prototypes, and scalable design systems.
- Collaborate with product managers, engineers, clinicians, and stakeholders to deliver accessible, research-informed solutions.

UX design intern *Sep 2025 - Dec 2026*

- Supported product discovery through user research, competitive analysis, journey mapping, and usability testing.
- Designed wireframes and interactive prototypes in Figma while iterating solutions based on stakeholder and user feedback.
- Contributed to accessibility improvements and design documentation, leading to a full-time Product Designer position.

YourTalent Consultancy **Rotterdam , Netherlands**

Head of Strategic Growth & Automation *Oct 2023 - Feb 2024*

- Increased LinkedIn organic reach by **50%** through targeted content and employer branding strategies.
- Improved client acquisition by **20%** by implementing automated outreach workflows and optimising recruitment processes.
- Collaborated with leadership to streamline internal operations using data-driven decision-making and automation.

Foundever **Sheffield , United Kingdom**

Customer Retention Advisor *Jun 2023 - Oct 2023*

- Delivered personalised support for high-value customer accounts, improving customer satisfaction and retention.
- Analysed customer concerns and collaborated across teams to resolve complex service issues efficiently.

PROJECT EXPERIENCE

Ajnalens **Thane , Maharashtra , India**

MAI *Jan 2026 - Present*

- Leading product discovery and UX design for an AI-powered women's health platform integrating wearable technology and personalised health experiences.
- Conducted field research with **50+ participants**, distributing wearable bands and collecting survey data to validate user needs and inform product strategy.
- Designed end-to-end experiences including onboarding, health tracking, AI recommendations, and behaviour-change features through iterative research and usability testing.

OJAS *Dec 2025 - Mar 2026*

- Designed an AI-assisted clinical consultation platform that streamlined the patient journey from self-triage and consultation to automated clinical documentation and follow-up.

- Defined end-to-end workflows connecting patient triage, clinician review, ambient consultation recording, AI-generated summaries, and actionable care plans.
- Collaborated with clinicians, AI engineers, and product stakeholders to integrate predictive, reverse, and enhancement AI models into clinical decision-making workflows.

Aarogyam with AIIMS

Oct 2025 - Dec 2026

- Designed clinician-facing experiences for AI-assisted departmental triage, helping doctors review structured patient histories before consultation.
- Created workflows enabling clinicians to validate AI-generated summaries, provide feedback on model outputs, and support continuous improvement of clinical decision support systems.
- Simplified complex triage information into actionable insights, reducing cognitive load and supporting faster, more informed clinical decisions.

Indusderma with AIIMS

Oct 2025 - Dec 2026

- Designed a multi-role dermatology triage platform connecting **patients, ASHA workers, and PHC doctors** to streamline community-based skin care referrals.
- Created AI-assisted workflows allowing patients to submit skin images and conversational symptoms, generating structured triage for frontline healthcare workers.
- Designed referral experiences that enabled ASHA workers to resolve eligible cases locally or escalate complex conditions to PHC doctors with AI-supported clinical summaries.

EDUCATION

Sheffield Hallam University	Sheffield, United Kingdom
<i>Master of Science in IT Management</i>	<i>Graduation Date: Mar 2023</i>
Smt. Kashibai Navale College of Engineering	Pune, India
<i>Bachelor of Engineering Computer Engineering</i>	<i>Graduation Date: Jul 2019</i>
K. K. Wagh College Of Engineering	Nashik, India
<i>Diploma In Computer Technology</i>	<i>Graduation Date: Jul 2016</i>

SKILLS

Product Design · UX Research · Product Discovery · Interaction Design · Information Architecture · User Flows · Journey Mapping · Wireframing & Prototyping · Usability Testing · Accessibility Design (WCAG) · Heuristic Evaluation · Design Systems · Figma · FigJam · Miro · NVivo · Agile Methodology

CERTIFICATION AND AWARDS

IxDF - Design for thought and emotions , Google UX Professional Certification - Coursera , Hallam Gold Award.
